

Week 7

-Designing with CSS-

*Utilizing the CSS designer in DreamWeaver is a simplified way to “code” without having to manually time the syntax.

*It is important to not that DreamWeaver has “automatic” functions for your code. By switching from “Auto”to “zero” you make the font on your code 100% to the USERS default font settings

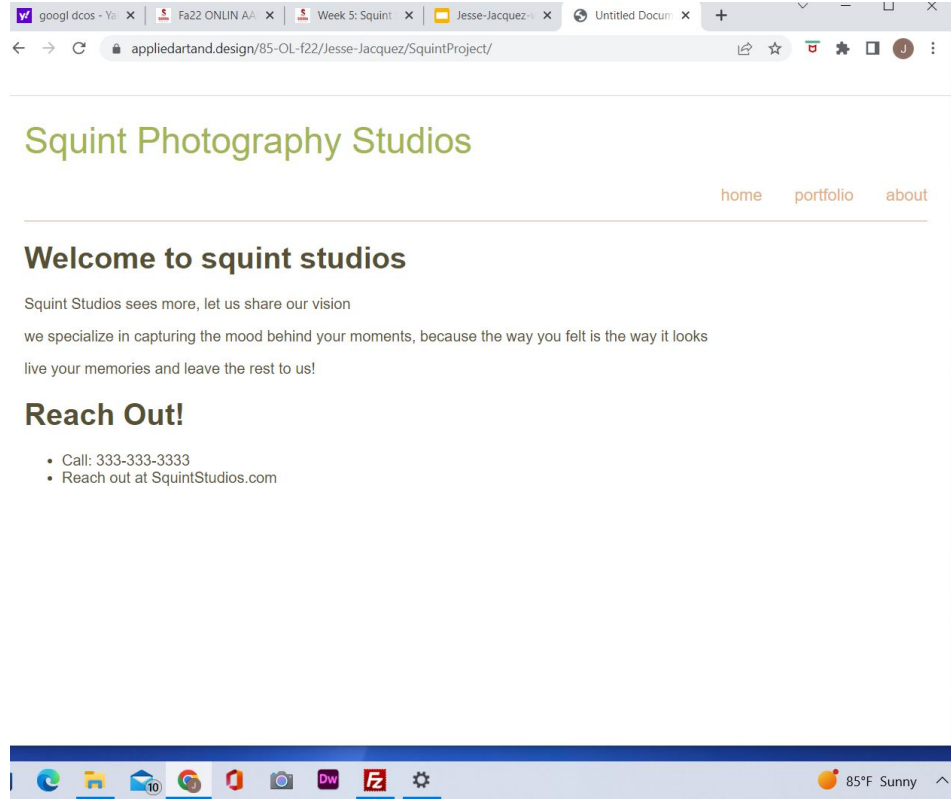

Summary of Tools, Talents, and Testing:

-**Tools** are programs, software, or resources that aid you on your coding quest. For example CSS design in DreamWeaver is a tool within a tool.

-**Talents** are people with backgrounds and certifications/experience with advanced coding

-**Testing** is an important part of finding bugs in your code, along with listening to a more public perspective on the usability and user friendliness of your web content.

-Squint Studio Progression-

Notes:
