

Week 9

-Image Optimization-

SOURCE IMAGES:

The original image. NEVER edited directly. (keep in source folder)

MASTER WORKING FILE:

-Edited/optimized image. (also stored in source folder)

OPTIMIZED FOR SCREEN:

-Will be stored in root folder. Go back to Master Work File to do ANY edits.

-Image Optimization-

.JPG

- Continuous Tone
- Photographically based (taken from camera)
- Loosy file (loses data with each save)
- NO transparency support

.GIF

- Large blocks of solid color/animation
- Minimal transparency support
- Only uses 256 colors for all pixels (not good for continuous tone)

.PNG

- Alpha Transparency
- solid color
- Continuous tone, glow, gradient, etc
- HUGE file size

-Image Optimization-

ADDITIONAL NOTES:

- Images in the foreground are considered content like graphs, interactive imagery, book covers, etc

- images in the background that are considered merely design aspects will be done in CSS

- Done with HTML using `<img>` or `<picture>` elements.

`<img>` MUST ALWAYS INCLUDE `(alt=" ")` and `(src= " ")`
